

## PSY 331 Cognitive Psychology Opinion Survey on Mental Processes

Our class is conducting an opinion survey to find out what people think about various mental processes. Please read each statement carefully and mark one of the response options to indicate your level of agreement.

1. People suffering from amnesia typically cannot recall their own name or identity.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

2. In my opinion, the testimony of one confident eyewitness should be enough evidence to convict a defendant of a crime.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

3. Human memory works like a video camera, accurately recording the events we see and hear so that we can review and inspect them later.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

4. Hypnosis is useful in helping a witnesses accurately recall details of crimes.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

5. People generally notice when something unexpected enters their field of view, even when they're paying attention to something else.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

6. Once you have experienced an event and formed a memory of it, that memory does not change.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

7. Children have learning styles (for example, visual or auditory) that are dominated by particular senses.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

8. Students learn better when they receive information in their preferred learning style.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know

9. A common sign of dyslexia is seeing letters backwards.

strongly agree     mostly agree     mostly disagree     strongly disagree     don't know
